Projects

Hospital Management System Advance Java, SQL Database

- Team project lead by me where I designed and created whole application and database using SQL and Advance Java.
- This application used for online appointment of patient and also provide feature of security .and it can also add new doctor who want to join in Hospital. It show appointment List with Pending and Successful Feature.

I pod Project React Js

- Fully working functionality for listening to music, all controls work : play/pause, forward, reverse, next, previous.
- Rotation-On simulation. (Device rotates and so does screen and buttons).

Travel and Tour Website React Js

- It is completely a frontend Project which I designed and created using ReactJS.

Ecommerce Website React JS , Firebase

- This project is made by React JS and Firebase which provide features of Login and Signup using Firebase and It also give features about add/ delete an item in Cart , buying an item and update price etc.

Certifications

- Web Development – Kaashiv Infotech , Chennai.
